

# NXTHINKING

## THINKING ABOUT THE BIG PICTURE

Examining the Big Picture guides us to the multiple connections and relationships in a system.

Seeing the Big Picture allows us to understand the change needed in the system.

## THINKING ABOUT CONNECTIONS

Uncovering the multiple connections and relationships that influence the way the world works helps make complex problems and situations easier to understand.

## THINKING ABOUT THE FUTURE

It is important to understand that people are at the centre of systems and are important parts of systems we want to change. There are no fixed futures; we can act to create change in any future.

## THINKING ABOUT PERSPECTIVES

Our perspective is the lens with which we view the world. Developing an awareness of our perspectives and the perspectives of others helps us understand systems and their effect on the world.

## THINKING ABOUT CHANGE

All systems are dynamic; they constantly adapt and change. Considering and connecting all the elements of NXthinking prepares us for meeting the challenges of the system.
